Solar Photovoltaic (PV) FREE Training Bootcamp

As New Jersey aims to become a clean energy state by 2035, it will need to add nearly 100,000 jobs over the next decade. Our bootcamp can help you train for entry-level jobs in this fast-growing industry.

Topics covered:

- Introduction to Solar PV
- Installation Fundamentals
- 2020, 2017, and 2014 National Electrical Code
- Hands-On Equipment Exercises
- Preparation for NABCEP Photovoltaic Associate Exam
- Solar PV Sales
- Solar Photovoltaic Design

Upon completion, you will:

- gain an understanding of solar energy systems, components, solar PV markets, electrical basics, and hands-on training to install rooftop solar arrays on residential and commercial buildings
- leave with the basic and advanced knowledge to take the NABCEP PV Associate exam in order to become NABCEP certified (highly sought after by employers)
- have the chance to network and interview for a job with an employer with active job openings in the field.

**February 5-9, 2024
9 a.m.-3 p.m.**
